The Royal sea Bream

Names & origins

LATIN : Sparus aurata

FRANÇAIS : Daurade royale

ITALIEN: Dorata

ANGLAIS: Mediterranean Sea bream

The gilthead sea bream owes its name to the golden band placed between its eyes. Its jaw is huge and has hooked protrusions at its front, as well as laterally placed molars. It can be found in a wide geographic area, from the Atlantic Ocean to the Mediterranean. It can reach up to 10kg and 70cm.
